RISO will exhibit two unique inkjet printers developed
for transactional printing: the RISO T1 full-colour
continuous feed inkjet printer and the RISO T2
high-speed full-colour cut-sheet inkjet printer.

RISO T1 was first presented at drupa 2016, and RISO has been continuously developing this unique full colour continuous feed inkjet printer that benefits from a “small footprint” and “excellent operability”. The latest version of the RISO T1 will be presented as a concept model. RISO T2 has just been launched, and is now available in key European countries and North America.

Features of the RISO T1

Compact full-colour printer with excellent operability for continuous roll-paper. With the ability to handle generic sizes of roll-paper, enabling you to use post-processing devices you already own. The RISO T1 lets you expand your printing business with ease.

- Compact size, simple structure, excellent operability, easy self-maintenance
- Duplex printing tower measures 1,495 mm (W) × 1,980 mm (D) × 1,720 mm (H)
- Print speed of 42 m / minute, max. roll width of 520 mm, and duplex printing feature realise productivity equivalent to 565 pages of A4 print per minute
- Supports AFP/IPDS, PDF, and PS workflows

Features of the RISO T2

High-speed full-colour cut-sheet inkjet printer, offering fast duplex printing.

- Optimum productivity of 320 ppm in duplex
- Affordable, full colour, variable data printing
- Supports AFP/IPDS, PDF, and PS workflows
