

PRESS RELEASE

New RISO solutions being unveiled at drupa 2016

24th May, 2016. *RISO UK*: Reliable, hi-speed printing just got even better with the news that RISO KAGAKU CORPORATION, famous for developing innovative inkjet technology, is to preview three new models at drupa.

The new devices to be added to RISO's already impressive stable of print solutions are the ComColor GD9630, the ComColor FW5230 and the digital duplicator SF9350.

The GD9630 is the world's fastest full-colour inkjet printer at 160 ppm (compatible with Fiery), while the FW5230 is a compact high-speed inkjet printer that streamlines print work.

Meanwhile, the SF9350 takes RISO's existing industry-leading digital duplicators forward by enhancing both speed and image quality.

And visitors to RISO's stand will also see two new concept devices ideal for transactional printing.

RISO T1

RISO T2

The RISO T1 is a compact full-colour continuous feed inkjet printer with productivity of 42m/minute, while the RISO T2 is a high-speed, full-colour cut sheet inkjet printer with productivity of 300ppm (duplex).

Tatsuo Murakami, managing director of RISO UK, said: "Although these three new devices are yet to be launched in Europe, visitors to the RISO Stand at drupa will be able to experience RISO's new innovations and see the unique possibilities that are open to them."

drupa takes place between May 31 and June 10 at Dusseldorf Fairgrounds, and RISO is in Hall 5, stand C20.
